Hi! I am an all-rounded Front-End UI Developer and I've been building websites professionally for over 10 years. I specialise in responsive UI development using HTML, CSS and JavaScript.

I've been part of several scrum teams and built many mobile-first, responsive, adaptive web experiences using the latest web-development tools, written with good, clean & maintainable code. I write pixel-perfect CSS. I also do some UI design and enjoy working with designers building beautiful & state-of-art user interfaces together. I firmly believe in minimalistic design and minimal code. Less is more :)

I have successfully delivered projects for several small and big names all over the world, working on full-time basis, agency work and also as a remote freelancer. To name a few - Puma, Columbia Sportswear, MSN, Scotch & Soda Amsterdam, Jack & Jones, Vero Moda, Nixon

I am also an avid traveller and have explored a lot of places over the last few years. This experience has exposed me to a lot of new people and cultures, and I am used to working in multi-national distributed teams on-site and remotely.
