

Sam Garg

Senior React/Vue Developer — E-Commerce & Headless CMS

linkedin.com/in/gargsam/

samgarg86@gmail.com

Senior front-end developer with 15+ years building production React/Next.js and Vue/Nuxt applications. Strong background in e-commerce front-ends and headless CMS integrations (Contentful, Amplience), gained across enterprise projects for brands like Vans, The North Face, PUMA and Citizen Watches.

I write clean, well-tested, maintainable UI code and enjoy working closely with designers and other developers to ship polished user experiences. I use Claude Code and sub-agents to move fast, reviewing every diff myself before it ships.

Outside of client work I build and maintain my own Nuxt 3 site end-to-end (saltylens.art) - front-end, marketing pages, SEO and deployment. Also been experimenting with Shopify's headless Hydrogen framework as a personal learning project.
