

Thinking about going composable, but not sure it's worth the cost and complexity? Already committed to a CMS but need someone to design content models your authors will actually enjoy? Or just need a senior React/Vue developer who moves fast without creating a mess?

15+ years as an architect and hands-on developer on e-commerce projects for brands like Vans, The North Face, PUMA, Zermatt Matterhorn Tourism and Citizen Watches, across e-comm platforms, headless CMS (Contentful, Ampliance) and React/Vue front-ends talking to them via APIs.

Architecture & Strategy

Weighing composable vs your platform's built-in tools? I can help you evaluate whether it's worth it for your size and budget, not just implement whatever's trendy. That includes practical calls about where to store images (CMS, e-comm platform, or a dedicated DAM like Cloudinary), what actually belongs in a headless CMS vs your e-comm platform, and what a React/Next.js layer really costs to build and maintain.

CMS Content Modelling

If the architecture is set and you need schemas designed: powerful enough for what marketing needs, simple enough that authors don't need a manual. Feature-rich under the hood, intuitive on the surface - not a cockpit of 1,000 buttons.

Hands-on delivery

I still write, review and ship code myself. I use Claude Code and sub-agents to move fast, review, test and enforce standards across codebases. I personally verify what actually ships to production: architecture decisions, performance impact and coding standards.

Startup Mindset

I've run my own ventures end-to-end, wearing every hat. I know what it's like with no one to hand a task to, so I ask the right questions, move with minimal direction, and take ownership. Comfortable owning the architecture conversation with stakeholders and being knee-deep in a POC the same afternoon.

RESTFUL APIS

WORK EXPERIENCE

CITIZEN WATCHES

TECHNICAL ARCHITECT

- Helped architect the front-end of citizenwatch.com.
- Laid out the foundations of the integration between the React FE (PWA-KIT), Salesforce Commerce (SFCC) and Contentful CMS.
- Designed the CMS schema and content models in Contentful

GENEROUS

FRONT END ENGINEER

- Helped shape the front-end architecture of an AI-assisted agentic gifting platform.
- Vibe coded the AI chat interface, calendar views and new features.

ASTOUND DIGITAL

TECHNICAL ARCHITECT | FRONT END | CMS TECH LEAD

- Technical Architect across major international brands including Columbia Sportswear, Timberland and Zermatt Matterhorn Tourism.
- Architected composable e-commerce solutions integrating React/Vue, Salesforce Commerce Cloud and enterprise CMS platforms.
- Designed the CMS schema and content models for e-commerce related content on several projects
- Led the front-end development of global e-commerce storefronts for brands including Vans, The North Face, Life Fitness, Columbia Sportswear and PUMA
- Contributed to headless/composable commerce solutions, including an SFCC accelerator built with React PWA Kit.

BESTSELLER, AMSTERDAM

SENIOR FRONT-END | E-COMMERCE DEVELOPER

Part of Bestseller's Demandware e-commerce team, delivering front-end for the group's 19 brands (including Jack & Jones, Vero Moda, Only) across 3,000+ stores in 70 countries. Led the Vero Moda website redesign and contributed to "Next Generation User Journey," a full front-end rebuild of all brand sites using modern web components and TDD.

DIGITASLBI (LOSTBOYS), AMSTERDAM

FRONT-END | E-COMMERCE LEAD DEVELOPER

Led front-end development for UK/EU retail clients (SCS, Vertu Global, Scotch & Soda) in a fast-paced agency environment. Built promotional campaigns for SCS that drove up to 400% sales growth over Christmas/New Year 2015

FUNDA, AMSTERDAM

FULL STACK WEB DEVELOPER

Funda is the largest online real estate company in Netherlands. funda.nl gets about 8 million hits a day. They have a fast-paced Agile environment with an interesting mix of technologies, mostly Microsoft based.

- HTML5, CSS and JS for mobile web-views used across different apps on different devices.
- Develop and maintain mobile website m.funda.nl

NINEMSN (MICROSOFT MSN / CHANNEL 9), SYDNEY

FULL STACK LEAD WEB DEVELOPER

Coordinating and developing, conducting daily stand-ups, mentoring fellow developers and liaising with clients and management. I worked in scrum teams building many projects:

- Re-design of the leading news portal of Australia — news.ninemsn.com.au
- Online marketing campaigns for several NineMSN clients
- London Olympics 2012 Gamification Campaign — users score points by sharing articles and are awarded badges.
- Organised company wide Hack days (Hackathon) for 100+ developers, designers and data analysts.
